The payment gateway sits between your website and your bank, encrypting all your credit and debit card data to ensure it cannot be read by anybody else. It can process all major credit and debit cards, as well as numerous alternative payment methods, in multiple currencies and you can choose which of these payments you want to accept, so you only pay for what you need.

Secure Trading Group, part of UC Group, was formed in 1999, and comprises of three companies whose intelligent and specialised approach to online payments is transforming the way that customers pay. Each offers different solutions for different markets, yet collaborate with one another in diverse and intuitive ways. The defining traits that unite the three companies are their vast international offering, specialist expertise and strong relationships with partners and clients.
